embossed aluminum tags are the best solution. If you want to mark a piece of equipment as being dangerous for a short period of time, then you need a tag which commands attention – a red vinyl tag, for instance, with the word “DANGER” spelled out in bold block letters. If you want field personnel to be able to add information to a form, then you need a self-sealing tag. There are literally thousands of different types of tags available to you, but they all should be designed and specified with the three basic factors in good tag design in mind:

- 1) Place & Condition of Use
- 2) Message/Information needed to be conveyed/captured
- 3) Audience – persons reading and/or filling out the tag

After all, you do not want to pay for a tag which will not last as long as you need, just as you do not want to overspend for a tag which will last twenty times longer than necessary.

Custom Vinyl Tags & Self-Sealing Tags

Let us assist you in the design and/or choice of a tag. Once we know the answers to basic design questions we can help you decide if you need a vinyl tag or a polyester tag, whether you need more than one color printing, or whether the tag needs an overlaminate. We can discuss with you how the tag will be attached, and whether or not there are any regulations involved with the place and condition of use. We are here to help make the buying decision easier.
