

Barricade Marking Tape

Barricade Marking Tape - Acts as a highly visible safety warning against inadvertent entry into hazardous or potentially hazardous areas. All tapes are made of tough virgin polyethylene materials.

- Standard Widths: 3 or 6 inches
- Standard Lengths: From 300 to 6,000 feet
- Standard Thickness: 2 mil or 4 mil
- Standard Legends and Colors for: Construction, Telecommunication, Electric Power, Natural Gas, Water & Sewer
- Custom Sizes, Lengths and Specifications Available

Underground Non-Detectable Warning Tape & Detectable Warning Tape

Non-Detectable Underground Warning Tape - Acts as a safety warning against inadvertent intrusion in the cable right of way. The warning tapes are treated so as not to degrade or fade when exposed to alkalis, acids and/or other destructive elements underground. All tapes are made of tough virgin polyethylene materials.

- Standard Widths: 3 or 6 inches
- Standard Lengths: From 1,000 to 6,000 feet
- Standard Thickness: 4 mil, 6 mil and Super Strength Woven 6.5 mil
- Standard Legends and Colors for: Telecommunication, Electric Power, Natural Gas, Water & Sewer
- Custom Sizes, Lengths and Specifications Available

Detectable Underground Warning Tape - Makes locating non-metallic utility lines easy and convenient. Detectable warning tapes also act as a safety warning against inadvertent intrusion in the cable right of way. All tapes are made of a tough poly/foil/poly blend of materials.

- Standard Widths: 2, 3, 6, or 12 inches
- Standard Lengths: From 1,000 to 2,000 feet
- Standard Thickness: 5 mil
- Standard Legends and Colors for: Telecommunication, Electric Power, Natural Gas, Water & Sewer
- Custom Sizes, Lengths and Specifications Available

Woven Reinforced Underground Warning Tape - Is the strongest member of the warning tape line. Whether used underground or as an above ground barricade, this is your heavy duty choice!

- Standard Widths: 3, 4, 6, & 12 inches
- Standard Lengths: From 200 to 6,000 feet
- Standard Thickness: 6 mil
