

Delineators

① Help Prevent Accidents: *Delineators have been shown to prevent accidents involving poles near roadways.*

① Avoid Changeout Costs: *Costly outages and repairs due to accidents can be reduced by giving motorists a chance to see field assets at night and in bad weather.*

① Reduce Liability: *Install delineators and make a good faith effort to upgrade to a safer system.*

Premax delineators are manufactured from .025" aluminum. Their reflective coating comes from 3M's Scotchlite™ reflective vinyl sheeting. All delineators are 2" wide and can be attached with nails. Attach to pad mounted gear with Scotch VHB™ 4945 double-sided tape or construction adhesive.

Custom lengths and widths (up to 7") are available.

Length	Style	Item	Qty
8, 10, or 12 inches	Scotchlite™* vinyl sheeting, Yellow	DLY-	bulk
