

GLN PLATE

PREMIUM QUALITY | MAXIMUM DURABILITY | FAST SHIPPING

GLN-Plates are designed to provide a stable, long-lasting surface for applying utility stickers and adhesive labels in the field. When direct-to-pole labeling is not ideal, the GLN-Plate offers a consistent mounting solution that helps protect label integrity and improve long-term visibility.

Built for outdoor exposure and utility environments, Premax GLN-Plates support organized asset identification programs while helping crews clearly identify infrastructure throughout its service life.
